Abdominal Aorta
Aneurysm

Ref: A-S-A-001

Abdominal aorta aneurysm model.

ELASTRAT in vitro models respect human anatomy and are designed for the development and demonstration of stents, coils and catheters. They provide a realistic environment for the simulation of endovascular procedures, pre-surgery training, studies and teaching purpose for interventionalists.

Top view with tubing from and back to the pump. Side view.

ELASTRAT in vitro models are compatible with modern imaging modalities such as digital subtraction angiography, computed tomography and magnetic resonance imaging. Providing the use of an adequate circulating fluid, Doppler techniques can also be performed. The in vitro models transparency to light makes them suitable for video and photographic monitoring.
