WORLD LEADER
IN ANATOMICAL HUMAN
VASCULAR REPLICAS

REF: H+N-S-A-009

**RIGHT INTERNAL CAROTID ARTERY MODEL
WITH SISTER GIANT ANEURYSM**

Ref: H+N-S-A-009

Right internal carotid artery model with sister giant aneurysm.

Our in vitro models respect human anatomy and are designed for the development and demonstration of stents, coils and catheters. They provide a realistic environment for the simulation of endovascular procedures, pre-surgery training purpose for interventionists.

Ref: H+N-S-A-009

Small aneurysm ø17mm, length 17mm, neck 10x12mm

Ref: H+N-S-A-009

Large aneurysm ø20.5mm, length 28mm, neck 6x10.5mm

These models are compatible with modern imaging modalities such as digital subtraction angiography, computed tomography and magnetic resonance imaging. Providing the use of an adequate circulating fluid, Doppler techniques can also be performed. The in vitro models transparency to light makes them suitable for video and photographic monitoring.
